

world famous herd bulls used
at

KC Shorthorns

(Average weight 2,255 lbs.)

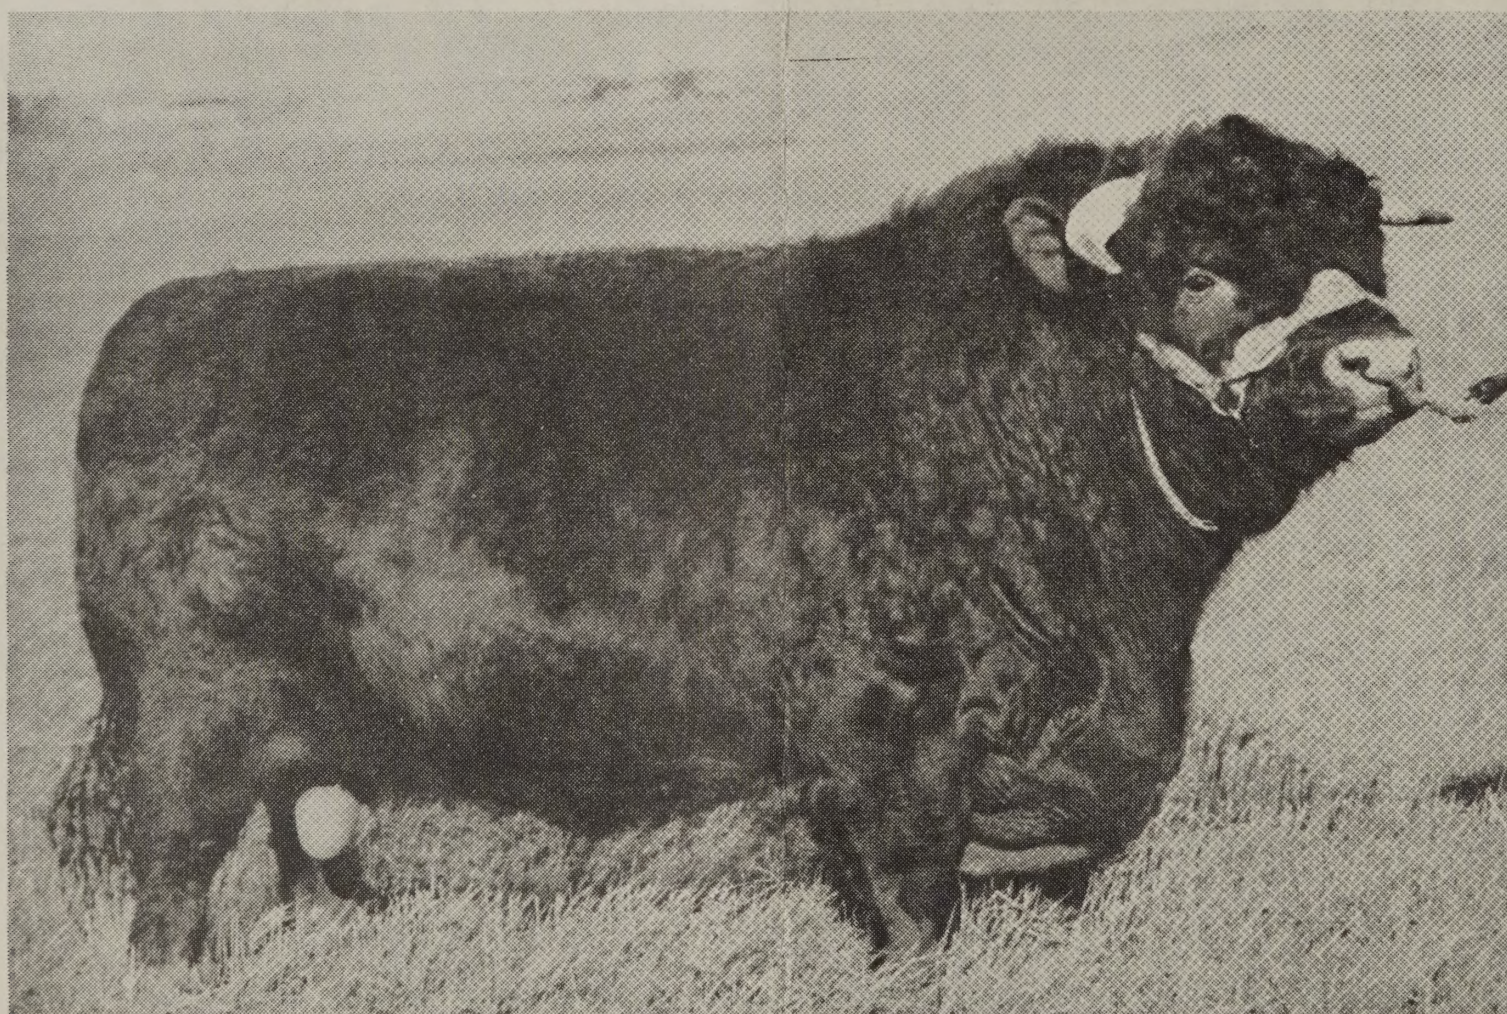

KC's GRAND CHAMPION Pen of Bulls, Denver, 1966

BAPTON CONSTRUCTOR - Red, January 25, 1955
Sire: Calrossie Constellation

Greatest breeding bull of recent times, he was imported at the then record price of \$50,000. Sired International and Perth Champions, and record selling stock that has gone out to all parts of the world.

After going back to Scotland he sired Denend Ragusa, 1965 Perth Champion and top selling bull at \$30,000.

KC was fortunate to use this bull liberally for several years and have retained 25 of his daughters.

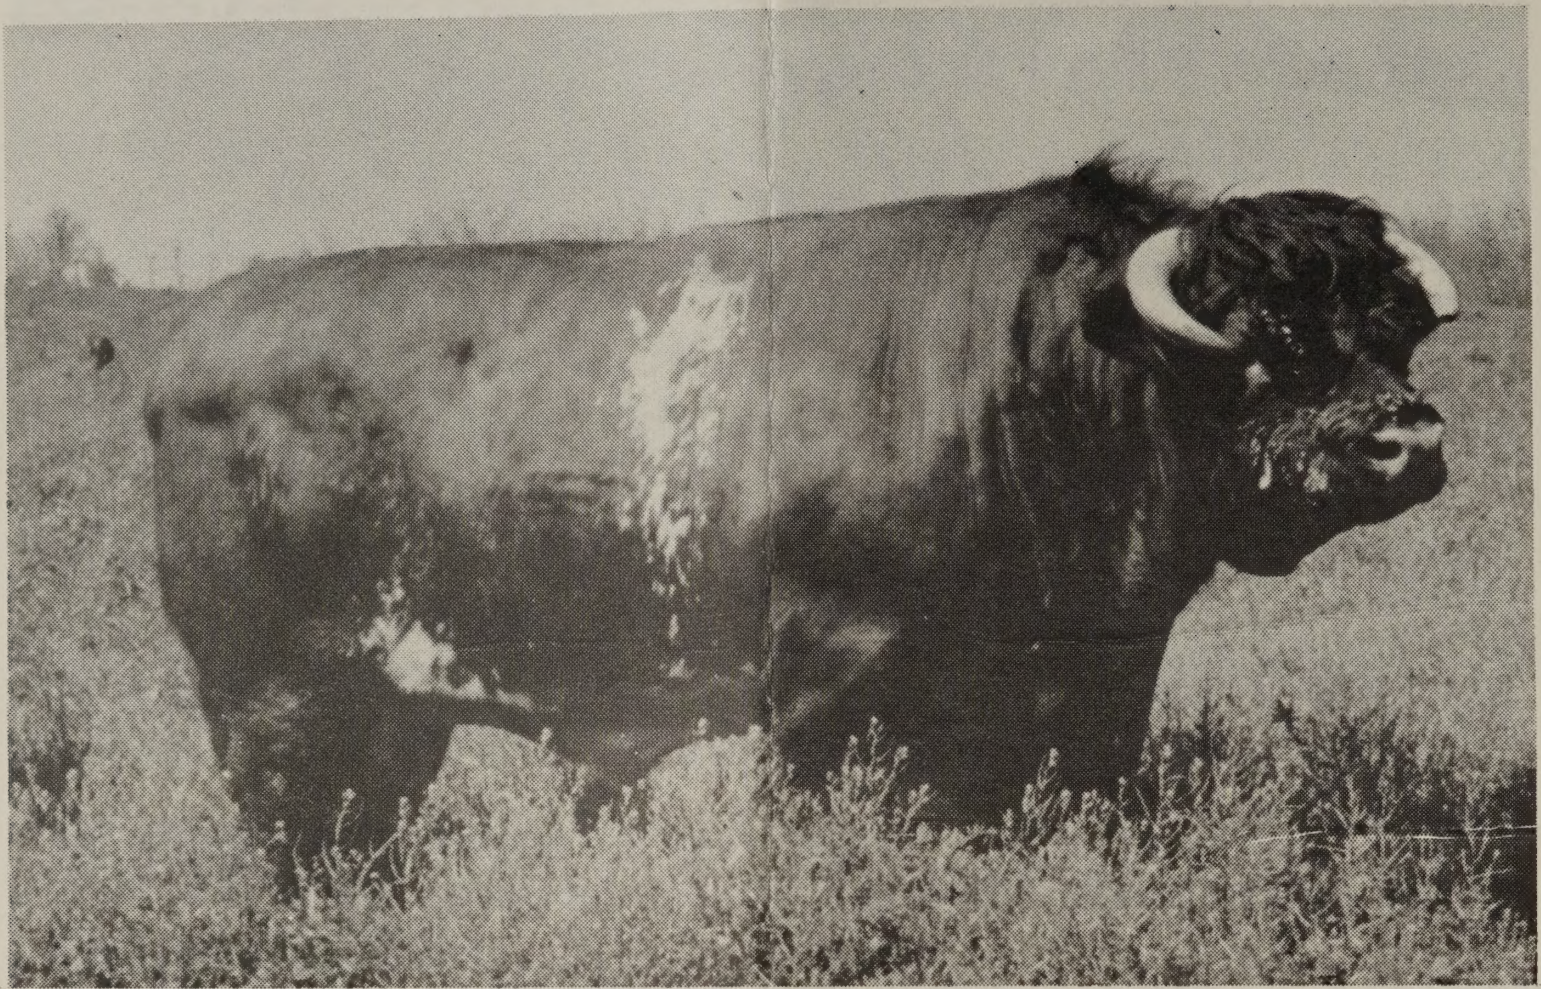

GLAMIS BENEFACTOR - Dark roan, August 1, 1960
Sire: Calrossie Diadem

World's record priced Shorthorn Bull, with the greatest show record of any bull in history! He was used in Scotland and sired a Reserve Champion at Perth, that later sold for a high figure in the Argentine.

His dam is one of Robert M. Adams and Sons' (Glamis) best cows. She has consistently produced winners and top selling cattle. Her full sister also produced a Perth Champion.

His first calf bred at KC was Reserve Junior Champion at the 1965 International. In 1966 at Illinois State Fair, Missouri, Mid-America and Kansas State Fair, his Junior Get was undefeated; his Pair of Females was undefeated. His Pair of Calves stood 1st at 3 fairs, 2nd at Illinois. His Senior Get stood 3rd at Illinois, and 1st at the 3 other fairs. His calves won 37 blues and 17 Championships at these four shows.

His progeny have the scale, size and character which make them desirable to modern beef producers.

LOUADA NUGGET - Roan, March 28, 1958

Sire: Bapton Constructor

North American Record Priced Bull. An outstanding son of Bapton Constructor that has made a great name for himself. In 1964-65 his progeny included the most consistent winners and top sellers throughout North America.

Daughters of Louada Nugget retained in the KC Herd show the great breed character and balance that he passes on to all his progeny.

KELBURN GREAT EVENT - Dark roan, Sept. 1, 1958

Sire: Bapton Copyright by Calrossie Constellation
Dam: Kelburn Clipper Beatrice 5th by Calrossie
White Emblem

This bull was selected for his size, character, and smooth flesh. He has a beautiful blend of Calrossie Constellation and Calrossie White Emblem in his pedigree thru Canada's Greatest-of-All-Time show cows, Kelburn Clipper Beatrice 5th.

His progeny has won dozens of Champions in the U.S. and Canada. No wonder top breeders today who are looking for scale have selected his sons to head their herds. Some of them have weighed a ton at two years.

CLIPPER KING OF BAPTON X - Dark roan, June 1, 1959
Sire: Coronet Max Leader
Dam: Bapton Fair Clipper by Calrossie Constellation

Bapton Fair Clipper, a 1,600 pound cow, is one of the greatest females in the Bapton Herd. Calrossie Constellation was the 2,300 pound 1957 "Bull of the Year." The Granddam, Fair Clipper 45th was undefeated Female of Great Britain in 1956.

Sons of Clipper King of Bapton head every leading polled herd in Scotland and England. One son weighed 2,576 pounds at maturity, another 2,016 pounds at two years.

Clipper King of Bapton X weighed 2,675 in his prime. His Calves at KC are uniformly big, strong, and show lots of character.

KC FARMS are located in Kansas City, Missouri. The main cow herd is on the old Roanridge Farm which was noted for its Shorthorns during the time of Sni-A-Bar. The farms consist of 500 acres which are in blue grass and improved pasture mixes. 120 acres of alfalfa from an adjoining farm is put up as haylage. No corn or other cereal is grown.

The Herd is comprised of eighty breeding females of the most fashionable and noted families, and only those of a high standard of quality and weight are retained. A large draft of Saltoun cows were obtained some years ago, and with their followers now total fifty head. Occasionally individuals of exceptional merit are added to the female herd.

Until 1967, bulls and females have been sold privately at the farm. In addition, some twenty bulls are run under range conditions and have been in excellent demand with breeders and ranchers. The balance of range bulls have been exhibited in the Yards at Denver during the National Western where they have been Champion Pen on each occasion, selling for an average of \$1,030 a head.

Although the herd has been building to its present size and quality, some twenty-five females are sold annually.

The cattle are out year-round and when the grass is short, or snow is on the ground, haylage is fed. Calves run with their mothers until 7 months old. Only the snow calves receive additional milk from nurse cows. No creep feeding is done until fall at which time oats, purchased in Iowa, are fed whole...Bulls and females are usually for sale.
